Good to know!

When will my container be emptied?

You can always take a look at your current waste calendar – to be super safe use our online reminder in addition!

What is the meaning of the "R"-, "R1"- and "R2"-stickers on the residual waste container?

These stickers indicate in which cycle the black container is emptied.

"R" = every 2 weeks / "R1" & "R2" = every 4 weeks

How can I prevent my bio container from freezing over in winter?

You can use wood shavings to cover the floor of the container. Damp waste can be wrapped in newspaper. In addition it helps to lift and loosen the waste from time to time.

My waste volume has changed, how can I adjust my containers?

This has to be done in written form - simply send us an e-mail or fill in the documents available online.

I would like to use my containers together with my neighbor, is that possible?

Yes. Both neighbors have to agree to this and the properties must be directly next or opposite to one another.

We will be happy to answer any further questions - you will find our contact details on the next page!

Our homepage offers you many services online. Interesting articles on current topics on waste disposal can also be found here.
